adlumin ™

What Makes Adlumin Different?

We won't let your organization get caught in the dark.

Adlumin's patented, cloud-native Security Operations Platform and Managed Detection and Response Services offer expert-led, enterprise-grade security tailored to a customer's size and budget. With a single platform and a single license, Adlumin customers have everything they need for comprehensive security, including SIEM, vulnerability scanning, threat intelligence, UEBA, honeypots, automated incident response and forensics, darknet exposure monitoring, compliance reporting and monitoring, and more. Adlumin customers can use this modern, cloud-based platform on their own, partner with managed service providers, and/or utilize Adlumin's MDR service to rely on an expert team that delivers 24x7 human insights, threat hunting, and trusted support.

Adlumin's platform is built specifically with channel organizations in mind. It uses a multi-tenant architecture that gives the facilitator and customer unmatched visibility while enabling them to act quickly and confidently to stop threats. Adlumin can monitor and defend networks locally, in the cloud, and across the globe.
